2. Solved Examples (उदाहरण और हल)

Example 1: A is B's sister. C is B's mother. D is C's father. E is D's mother. Then, how is A related to D?

Solution: A is sister of B, and C is mother of B means C is mother of A. D is father of C, which means D is maternal grandfather of A. Therefore, A is the **Granddaughter** of D.

Example 2: Pointing to a photograph, a man said, "She is the daughter of my grandfather's only son." How is the woman in the photograph related to the man?

Solution: Man's grandfather's only son is the man's father. The daughter of the man's father is his **Sister**.

Example 3: If $P + Q$ means P is the mother of Q; $P - Q$ means P is the brother of Q; $P * Q$ means P is the father of Q, then which of the following means 'A is the niece of B'?

Solution: For A to be the niece of B, A must be female and child of B's sibling. Checking options or direct relation: If $B - C * A$ (B is brother of C, C is father of A), then A is niece. Answer: **B - C * A** (or equivalent check).

Example 4: Introducing a boy, a girl said, "He is the son of the daughter of the father of my uncle." How is the boy related to the girl?

Solution: Girl's uncle's father is girl's grandfather. Grandfather's daughter is girl's aunt (or mother). Son of aunt is **Cousin**.

Example 5: A is the father of C. D is the son of B. E is the brother of A. If C is the sister of D, how is B related to E?

Solution: A is father of C and C is sister of D, so A is father of D. D is son of B, so B is mother of D and wife of A. E is brother of A. Therefore, B is the **Sister-in-law** of E.

Example 6: Pointing to a lady, a man said, "The son of her only brother is the brother of my wife." How is the lady related to the man?

Solution: Brother of man's wife is his brother-in-law. He is the son of the lady's only brother. Thus, the lady's brother is the father-in-law of the man, making the lady the **Sister of Father-in-law (Aunt-in-law)**.

Example 7: Q is the son of P. X is the daughter of Q. R is the aunty of X, and S is the father of R. How is P related to S?

Solution: P is father/mother of Q, Q is father of X. R is aunt of X (sister of Q). S is father of R, so S is father of Q and P. Thus P is either wife or child of S. If P is parent, P is daughter-in-law or son/daughter. Usually, P and S are husband-wife or parent-child. Correct relation: P is **Daughter-in-law or Child** of S.

Example 8: If $A + B$ means A is brother of B; $A - B$ means A is sister of B; $A * B$ means A is father of B, which of the following shows that C is the maternal uncle of D?

Example 10: Pointing to a photograph of a girl, Suresh said, "She has no sister, but her mother is the only daughter of my mother." How is Suresh related to the girl?

Solution: Suresh's mother's only daughter is Suresh's sister (or Suresh himself, but Suresh is male, so his mother's only daughter is his sister). The girl's mother is Suresh's sister, meaning Suresh is the **Maternal Uncle (Mama)** of the girl.

Example 11: Ram is the father of Sita, and Geeta is the mother of Ram. How is Sita related to Geeta?
